

CALL FOR NOMINATIONS

Deadline: March 21, 2016

ACS
Chemistry for Life®

What is Heroes of Chemistry?

Heroes of Chemistry is an award sponsored by the American Chemical Society that recognizes industrial chemical scientists whose work has led to the successful development of commercialized products ingrained with chemistry for the benefit of humankind.

Each year, ACS Heroes are nominated by their respective companies to recognize their creative abilities in developing cutting-edge science that ultimately leads to marketable products. The commercial success of their products is important for this honor because we recognize that good business results follow good science.

Eligibility

Any private or publicly owned for-profit company may nominate an individual chemist, biochemist, chemical engineer, or a team of scientists who played a vital role in the research and development of a commercial product.

Nomination Process

Nominations will be evaluated on the basis of technical merit, commercial success/financial performance, and benefit to humankind. Each nomination should emphasize chemistry's central role in the development of the product(s) being highlighted.

Award Recipients

The 2016 Heroes of Chemistry will be honored during a black-tie dinner ceremony on August 21, 2016 in Philadelphia, PA. Each winner will receive a crystal award, and will be publicly recognized on acs.org and in several ACS publications following the ceremony.

All nominations must be received by Monday, March 21, 2016.

Nominees will be notified by June 2016.
