Chemistry & Industry

- *Chemistry & Industry* magazine reports on how scientific advances are being harnessed to tackle society's biggest challenges.
- *C&I* covers innovations in agrifood, energy, health and wellbeing, materials, sustainability and environment, as well as science careers, policy and broader policy issues.
- It focuses on telling stories about getting scientific innovation out of the lab and into society where it can make a significant difference to the lives of everyone.
- It reports on the exciting intersection of scientific discovery and the creation of new innovative products and services that can benefit society in the broadest terms.
- *C&I* includes news on scientific discovery and commercialisation, a business digest which looks at the companies at the forefront of research and development, plus comment pieces from within the industry, deeply reported long-form features and regular looks at cutting edge research coming out of SCI journals and others.
- From the implications of new chemical discoveries through to the rise of AI or the outlook for science-based research and development, *C&I* keep readers up-to-date with the news, views and issues that matter to you.
- *C&I* is relied on by an industry-informed readership, interested in learning about innovation breakthroughs and the commercialisation of research and development.
- *C&I*'s readers are business people, opinion formers and decision makers. They can be found in universities and research organisations, chemical and pharmaceutical producers, start-ups, SMEs and other science-based manufacturers and suppliers.
