Candidates Nominated for Election at the 136th SCI Annual General Meeting

Below are the details of candidates who have applied for vacant positions on SCI's Board of Trustees and its Standing Committees.

BOARD OF TRUSTEES

Ordinary Members of the Board of Trustees

Mr Thomas Moore
I have served SCI since 1998 in a variety of roles including Chair of the Process Engineering Group and Member of the Marketing & Development Advisory Committee. In my current role as a Trustee, I am working with our Executive Director, her team and SCI members to help shape the Society's digital future. I am the Board of Trustees' representative on the CRM implementation project – a major initiative to improve the efficiency and functionality of SCI's information technology systems so that they better serve the Society, it's membership and wider stakeholders over the coming years.

Through my active involvement with SCI across its regional and technical interest groups and governance I understand the importance of the relationships between the Society, its members and wider stakeholders. In the private sector, I have led the development strategies of SMEs and not for profit organisations. I believe that my commercial experience adds value to the Board of Trustees and helps to develop SCI in line with its charitable objectives and in close partnership with its members and customers. With a career background in information technology, I look forward to offering my technical experience to help SCI to develop its digital future for the benefit of members and stakeholders.

I value the Society's heritage and principles and I am driven to secure its continued relevance and success through the measured pursuit of new opportunities and especially initiatives which leverage the benefits of electronic interaction and support the promise 'where science meets business'.

SCI can benefit enormously from the opportunities presented by new technologies. Digital conversations through social media and interactive conferences via webcasting are just around the corner and both can help to widen SCI's reach and influence. New technologies should complement personal contact and SCI's digital future should encourage engagement, interaction and participation.

There are three options for voting this year:

1. Voting by post
2. Online voting
3. Vote in person at the Annual General Meeting

Monday 26 June
Wednesday 28 June
Wednesday 5 July
