HIGHLIGHTS IN CATALYSIS, PHOTO- & ELECTROCHEMISTRY

SCI[®], LONDON, UK

SCI[®]'s Young Chemists' Panel

HIGHLIGHTS IN CATALYSIS, PHOTO- & ELECTROCHEMISTRY

As part of SCI YCP's "Highlights in..." series, this event will celebrate recent advances in modern organic synthesis, providing an exciting overview of new methodologies and industrial applications. Held over two days, the meeting will explore two hot topics: Catalysis, and Photo- and electrochemistry. Research discussed will range from asymmetric catalysis to photocatalysis to computational studies of organometallic catalysts.

The meeting will comprise of short talks from early career researchers and recently appointed academics, and keynote lectures from established researchers in academia and industry. All talks will be followed by a chance to ask questions and networking opportunities allow a possible exchange of ideas.

ATTENDEES

This event will be of interest to those working in the pharmaceutical, biotechnology or agrochemical industries who want to develop their knowledge in key areas of organic synthesis. It is also aimed at those in academia, particularly graduates and post-graduates with a background in synthesis and catalysis.

EXHIBITOR

£850+VAT

-  **1 DELEGATE** Registration and refreshments for one delegate as outlined in the programme
-  **Exhibitor stand** and furniture package (table no larger than 1.5m x 1m, chair, standard room lighting)
-  **INCLUSION** Logo and 50 word company profile in **electronic delegate packs**
-  **Logo** on the **SCI® event website** (with URL link to organisation website) and on screen in auditorium on the day of the event

PLEASE NOTE: attendance to technical sessions is at an additional charge

SPONSOR

£500+VAT

-  **Logo** on the **SCI® event webpage** with link to organisation website
-  **INCLUSION** Logo in the **electronic delegate packs**
-  **PROMOTION** Logo on **screen in auditorium** on the day of the event
-  **Mention** by **chair** during event

ADD ON OPTION:

-  **2-minute** pre-recorded presentation/ **video slot** during event - £250 (+ VAT)

CONTACT

If you would like to sponsor an event or request further information regarding prices, bespoke packages, exclusive opportunities, or additional bolt-ons such as SCI® membership, please get in touch: conferences@soci.org

SOCIETY OF CHEMICAL INDUSTRY

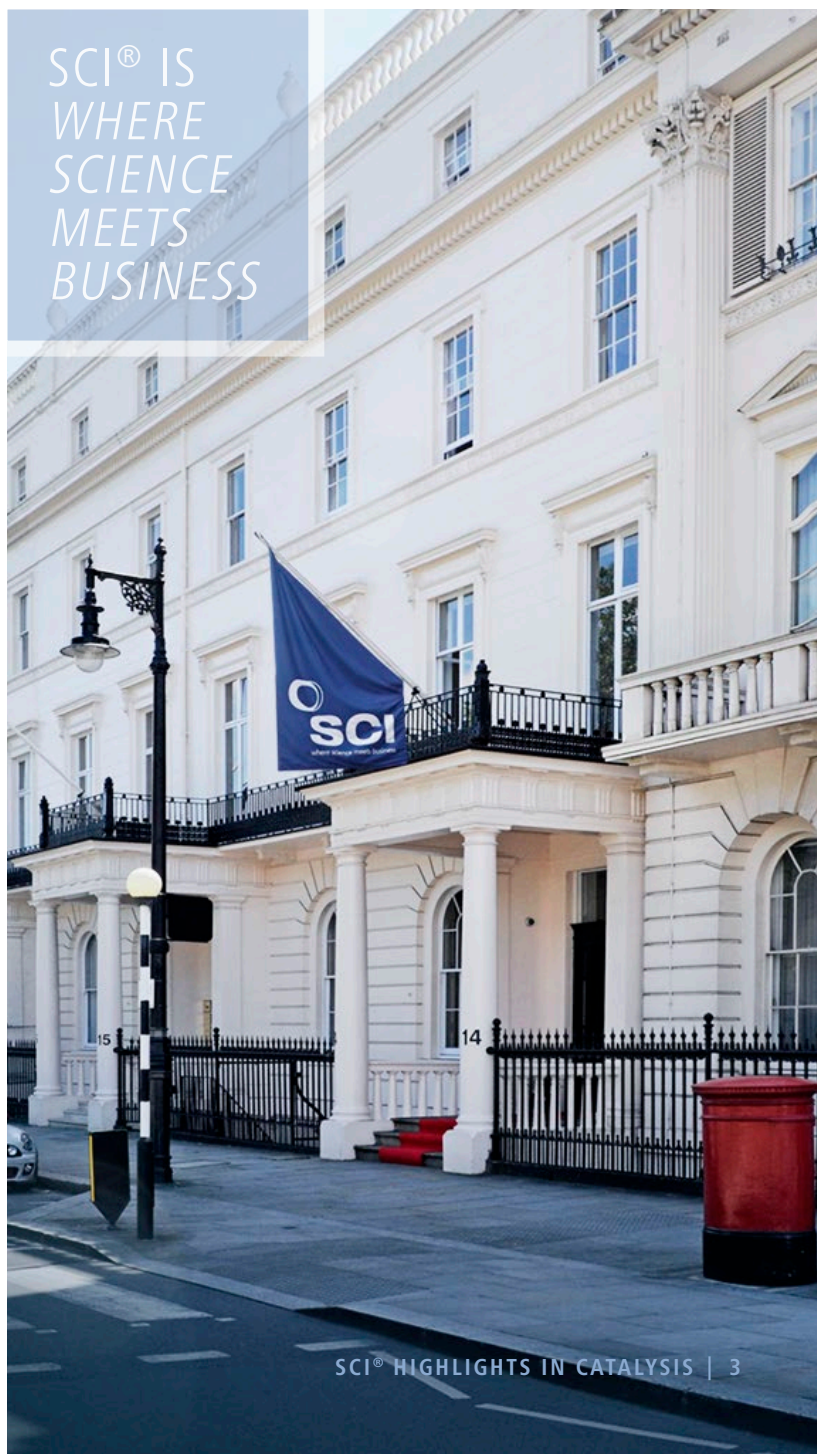

The Society of Chemical Industry (SCI®) is a learned society, **established in 1881** to promote the application of chemistry and related science into industry for the benefit of the public.

SCI® was established by **a prominent group of Scientists, Inventors, and Entrepreneurs**; with founder members going on to set up major businesses, producing many of the daily products we recognise today.

The Society is **unique, being a multi-science and multidisciplinary international community**. SCI® works at the interface between science and industry, conducting a range of activities that focus on supporting innovation and the commercialisation of science.

We provide a forum for members to come together to develop commercially viable solutions to some of the biggest challenges facing society today. SCI® places great emphasis on providing support for the next generation of people moving into industrial and applied roles across the chemical using industries.

SCI® IS
WHERE
SCIENCE
MEETS
BUSINESS

SCI® is
a global
organisation -
connecting
science with
business.
