WHERE SCIENCE MEETS BUSINESS

ABOUT SCI®

SCI® (Society of Chemical Industry) is a global network of innovators, **formed in 1881 by prominent scientists, inventors and entrepreneurs** of their day, who went on to form the companies, processes and products that have propelled society forward ever since. At its centre an active community provide a melting pot of ideas that support and grow the scientific sector for the good of society. SCI®'s work spans across a diverse range of areas including agrisciences, colloid and surface chemistry, construction materials, electrochemical technology, AI and digitalisation, fine chemicals and innovation.

The **SCI® network has over 60,000 individuals and companies** working across a broad range of industries including pharmaceuticals, petrochemicals, materials and agriculture. We offer many occasions for you to connect with other members of the community and expand industry links.

Whether it be covering the latest developments in surface chemistry, addressing national challenges such as industrial decarbonisation, or discussing opportunities in automation, SCI® conferences will have something to interest you. Our full programme of events can be found here: soci.org/events

For more information visit: soci.org

ATTENDEES BY SECTOR

SOCIETY OF CHEMICAL INDUSTRY

“It has been a pleasure to become a part of SCI®, which has given us access to an incredible network of events and talented individuals, of which several have already contributed to CardiaTec’s progress. We are looking forward to building on this relationship with the Society.”

Raphael Peralta,
CEO of CardiaTec, Cambridge University
Winner of Bright SCIdea 2022

SCI is
a global
organisation –
connecting
science with
business.
