

Candidates Nominated for Election at the 138th SCI Annual General Meeting

Early Career Committee

Ordinary Member of the Early Career Committee

Miss Libby Linfield

Having completed two internships in industry during a 4-year degree in Natural Sciences I have first hand experience of the highly competitive undergraduate and graduate job market. As such I have a good understanding of how to help young people look for opportunities and build their CV.

Additionally, I have experience in event organisation, fundraising, business case ideation, effective networking and presenting.

I will be entering a graduate scheme at Airbus Defence and Space in 2019, as such I would like to use this as a platform to increase the connections and involvement of SCI to the remote sensing industry. Additionally, I would like to see more competitions and events similar to BrightSCIdeas, giving young people a chance to think of science from a financial and business perspective. From experience, I think this is an extremely valuable skill to help people about to start their careers in industry as I owe an internship in finance to the opportunities that have thus followed.

I first became a part of SCI when I entered and won the 1st BrightSCIdeas challenge as part of team Glucoguard. From this I have further become an Ambassador, sharing relevant events with UCL, presented at the College of Scholars' Day (2019), giving a 'Winner's perspective' of the BrightSCIdeas challenge. I have also attended the Societal Medal Dinner (2019) and signed up to the mentor programme.

There are two options for voting this year:

1. Voting by post
2. Online voting
